Hi Kimberly,

Our office has provided the following names to the front door guards to let into the building. We want to accommodate as many people as possible. The limiting factor is the size of the room that is available, but we can pull in chairs and make it all work. If there are names that are different, or that do not appear, please let me know, otherwise, these folks may not be admitted into the building.

Thank you, and see you this afternoon!

Felicia

The request went in but what I heard is that we don't hear back until Tuesday of next week. If there is any opportunity to finalize a date and time that would be most helpful.

In terms of questions or concerns.

We first want to thank EPA for taking on this task and conducting the scientific assessment and would hope that the outcome leads to a 404(c) process.

This teleconference is very helpful that addresses some of our concerns. The timeline, who is on the team, what are they looking at and what are the parameters around the collection of data, and the model that will be used with this data. I will share this our delegation. Not all of them are on the teleconference.

Kim
